What did you appreciate most about this class?

practical

the content was interesting

Super well explained and the material was the perfect practice to do well in this course. She took her time explaining everything and made sure to focus on things that the professor did not explain too well.

Is there anything you would like to see the TA do to improve his/her teaching?

No, she treated her work very patiently. She explain everything in detail and would skip the questions when she believe the professor did wrong with the answer key and she did not receive replies from the professor yet.

only do a few problems and explain how to do the problems start to finish

It would be very helpful if the TA would go over how to plug the numbers into the financial calculator instead of giving us the answer. I rather go over fewer problems during discussion and use the financial calculator instead of us having to figure it out after.

Personally, I see no improvement as they were very helpful, accommodating, and understanding.
