## What did you appreciate most about this class?

I appreciate the materials about stock market and how to apply the calculation to find the valuation of the companies. TA Hyun is very nice and responsive to students. I appreciate her a lot because she tried her best to help students. One time I asked her about a question I did not understand and she gave me such a thorough email response to help me understand better. She is one of the best TAs I have in school!

It was an interesting and fair class

Going over the problem sets

Ta is pretty nice though

Solve problem set questions, support students to do well in review problems and midterm.

Regular quizzes to help us retain information

I appreciated how organized the class was. I also liked that our grade wasn't just made up of exams. The RP's forced me to stay on top of material and constantly study for the class which helped with my performance on the exams. The problem sets also provided valuable examples that helped me learn and understand the material.

It improves my basic knowledge of finance and pave the way of my graduate studying

The TA was nice and was good about covering everything she had planned to in the limited time given.

## Is there anything you would like to see the TA do to improve his/her teaching?

All her discussion is clear and helps me a lot on exam. Keep going :)

---

There were times where I would be in a position where the TA would erase the board seconds after they finished writing something down. So, I came to the conclusion it was better to take pictures rather than to try to note take in real time, especially as a slower note taker myself. If she could leave things visible longer while continuing to write elsewhere (just when using the whiteboard, when it was on the tablet/computer it was fine pacing wise) that would be helpful for students like me who do prefer to take hand written notes when given the chance.
